

PABLO BASTIAS

FULL STACK DEVELOPER | AI INTEGRATION

Phone: 15 2662-4568

Email: pablo_pages@live.com

Web: www.pablobastias.com

ABOUT ME

Semi-senior developer with 3 years of full-stack development experience, specializing in building scalable web products. I have developed end-to-end solutions using technologies such as React, Node.js, and PostgreSQL, including a RAG architecture application for querying documents in natural language with evidence-based responses. I focus on creating maintainable software, optimizing processes, and applying artificial intelligence to real-world use cases.

EXPERIENCE

PATAGONIA IT / SEMI-SENIOR FULL STACK PROGRAMMER (2023 - PRESENT)

Developed and maintained core features for a modular ERP system focused on logistics and sales operations. Implemented B2B and B2C integrations, including Magento, improving order and inventory synchronization across systems. Integrated external regulatory systems such as SENASA, ensuring compliance with industry requirements. Optimized order fulfillment and inventory management workflows, reducing operational delays. Contributed to improving warehouse and logistics planning processes by delivering scalable and maintainable solutions.

MOTIVARNOS / JUNIOR FULL STACK DEVELOPER (2023 - 2025)

Developed features for a gamification platform aimed at increasing user productivity through missions, trivia, and interactive experiences. Implemented user data tracking and analytics systems to measure engagement and performance. Improved user experience through interface and interaction optimizations, increasing overall platform engagement. Contributed to building a scalable solution designed for high-demand environments such as call centers.

EDUCATION

UNIVERSIDAD NACIONAL DE AVELLANEDA UNDAV (2018 - 2023)

COURSEWORK IN COMPUTER ENGINEERING

SKILLS

- Frontend:** React, React Native, Tailwind, Next.js, Bootstrap
- Backend:** Node.js, NestJS, Java, PHP, Laravel, TypeScript, Codeigniter
- Tools & DevOps:** Docker, Git, GitHub
- AI / Automation:** Python, N8N
- Databases:** PostgreSQL, MySQL
- Languages:** Spanish Native, English B1/B2

PROJECTS

GESTCONTRATOS (SEPTEMBER 2025)

- Built a platform that automates contract generation using AI-based lead scoring.
- Reduced manual work and improved decision-making in sales processes.
- Tech: Node.js, React, ChatGPT API

MERCADOAHORA (FEBRUARY 2026)

- Built a marketplace platform with integrated payments and an EcoScore system to promote sustainable purchasing decisions.
- Enabled secure transactions and improved user experience through real-time product management and seamless checkout flow.
- Tech: Node.js, React, MercadoPago, PostgreSQL

PAQUETESBA (JANUARY 2025)

- Built a logistics platform with real-time package tracking and digital signature capabilities.
- Improved delivery efficiency and transparency through live updates and mobile-friendly workflows.
- Tech: Node.js, React Native, PostgreSQL
